3B 2-HOUR FIREWALL

ADVANCED FIRE PROTECTION

The **3B 2-Hour Firewall** is a high-performance, fire-resistant solution specifically designed to protect critical environments from fire hazards. This advanced firewall system is ideal for a variety of sectors, including **industrial facilities, government buildings, data centers, military installations, and critical infrastructure**. With a certified **2-hour fire protection rating**, the 3B Firewall ensures that these critical areas remain secure, operational, and protected during fire emergencies, offering peace of mind in high-risk scenarios.

KEY FEATURES:

- **2-HOUR FIRE RESISTANCE:** The **3B 2-Hour Firewall** provides **up to 2 hours of certified fire protection**, meeting stringent safety standards to prevent the spread of fire. This extended fire resistance ensures that critical infrastructure, such as **power plants, data centers, and substations**, remain structurally intact and protected during fire outbreaks. By maintaining the integrity of the protected areas, the firewall buys essential time for emergency response teams, preventing catastrophic damage and protecting valuable assets.
- **HIGH-STRENGTH DESIGN:** Built from **high-strength materials**, the 3B Firewall is designed to offer long-term durability and high reliability, even in extreme environments. These materials ensure that the firewall retains its fire-resistant properties under high temperatures and pressure, providing a solid defense against fires in facilities where the risk of fire is significant. This high-strength construction allows the firewall to withstand intense heat without compromising its ability to protect key areas.
- **FORCED ENTRY RESISTANCE:** Beyond its fire protection capabilities, the **3B 2-Hour Firewall** also incorporates **forced entry resistance**, providing a comprehensive security solution for high-risk environments. Whether it's a **government building, industrial facility, or military installation**, this added layer of security ensures that sensitive areas are protected not only from fire but also from potential intrusions during emergency situations. This dual function helps safeguard personnel, assets, and critical operations, keeping unauthorized access at bay.

APPLICATIONS:

- **POWER GENERATION FACILITIES:** Power plants and substations are the backbone of the national grid, and fire hazards in these environments can cause significant operational disruptions. The **3B 2-Hour Firewall** is designed to prevent the spread of fire in these high-risk areas, ensuring that **power generation facilities** continue to operate without interruption and that personnel remain safe. The firewall also serves to protect vital equipment from being compromised by fire damage.
- **SUBSTATIONS AND UTILITY INFRASTRUCTURE:** In **utility infrastructure**, electrical systems and equipment are particularly vulnerable to fire hazards. The 3B 2-Hour Firewall provides an extra layer of protection for these crucial assets, ensuring operational continuity and minimizing the risk of fire-related disruptions in **substations** and other utility-related environments.
- **GOVERNMENT BUILDINGS:** Sensitive government offices, **embassies**, and high-security government buildings require robust fire protection solutions. The 3B 2-Hour Firewall provides a critical barrier that contains and controls fire outbreaks, ensuring that essential operations continue without significant downtime or damage. The firewall also helps safeguard key governmental assets, personnel, and classified information.
- **DATA CENTERS:** As data is the lifeblood of many organizations, **data centers** must remain operational even in the face of fire threats. The **3B 2-Hour Firewall** is designed to protect vital data storage infrastructure from fire hazards, maintaining structural integrity and preventing fire from spreading. By doing so, it ensures the continuity of data processing and storage, which is crucial for businesses and public services alike.

- **MILITARY INSTALLATIONS:** Military bases and storage facilities often house sensitive equipment and personnel who require additional protection from fire hazards. The 3B 2-Hour Firewall's durability and fire resistance ensure that **military installations** are safeguarded from fire damage, maintaining operational security even under the most challenging conditions.
- **INDUSTRIAL FACILITIES:** Fire hazards are particularly prevalent in **industrial facilities** such as **LNG plants, chemical processing facilities, and factories**. The 3B 2-Hour Firewall provides fire protection tailored to these environments, safeguarding both equipment and personnel. Its fire-resistant properties are essential for industries where flammable materials are present, minimizing the risk of large-scale fire outbreaks and protecting vital industrial operations.

PERFORMANCE STANDARDS:

- **FIRE RESISTANCE:** Certified for **up to 2 hours** of fire protection, effectively preventing the spread of fire and maintaining the structural integrity of critical infrastructure.
- **FORCED ENTRY RESISTANCE:** Designed to withstand unauthorized access attempts during emergencies, adding an extra layer of security to high-risk facilities.

TECHNICAL SPECIFICATIONS:

- **MATERIALS:** Constructed from **high-strength composite materials** for long-term durability and fire protection.
- **FIRE RESISTANCE:** **2-hour certified protection.**
- **CUSTOMIZABLE THICKNESS:** The firewall can be tailored to meet specific project requirements and fire safety needs.
- **INSTALLATION:** Suitable for both **new constructions** and **retrofit projects**, offering flexible and seamless installation options.

WHY CHOOSE THE 3B 2-HOUR FIREWALL?

- **UNMATCHED FIRE PROTECTION:** The **3B 2-Hour Firewall** provides **advanced fire protection** for critical infrastructure, ensuring that key areas remain structurally sound during a fire emergency.
- **DURABILITY AND RELIABILITY:** Built from high-strength, durable materials, the firewall offers long-lasting security that you can count on, even in extreme conditions.
- **CUSTOMIZABLE SOLUTIONS:** Designed to meet the specific needs of your facility, the **3B 2-Hour Firewall** can be tailored in size, thickness, and configuration to provide a perfect fit for any high-risk environment.
