3B BALLISTIC GROUT

3B Protection offers advanced grout formulations that combine ballistic resistance, blast absorption, and forced entry prevention in one powerful solution—reinforcing critical structures like walls and floors to withstand a range of high-risk threats.

Designed for superior protection, durability, and cost-effectiveness, these grouts provide peace of mind in the most vulnerable environments. With their flexibility and adaptability, 3B Protection's grouts are an ideal solution to meet the unique security needs of any facility or project.

KEY FEATURES:

- **Ballistic Protection:** Engineered to mitigate the effects of high-velocity projectiles, our grout resists penetration, protecting critical structures from firearms and other ballistic threats.
- **Blast Resistance:** The advanced formulation absorbs and disperses explosive forces, minimizing structural damage and maintaining integrity under severe blast conditions.
- **Forced Entry Resistance:** With enhanced durability against physical attacks, this grout delays unauthorized entry by reinforcing CMU (Concrete Masonry Unit) walls and other structural elements.

APPLICATIONS:

- Critical Infrastructure
- Wall Reinforcement
- High-Risk Facilities

BENEFITS:

- **Comprehensive Defense:** Provides a multi-layered defense system that significantly enhances the security of CMU walls and floors against multiple threats.
- **Cost-Effective:** More economical than installing separate systems, this integrated solution offers a high level of protection without compromising performance.
- **Customizable:** Tailored to meet the specific security needs of any facility, from government installations to residential security upgrades.
