3B LINE-OF-SIGHT WALLS

3B Protection's line-of-sight walls offer a comprehensive and versatile security solution that integrates ballistic resistance, blast resilience, forced entry defense, and fire protection into a single adaptable system. These walls are particularly valuable for high-security environments such as military installations, critical infrastructure, and sensitive government or commercial properties.

Their unmatched protective features are complemented by the advantage of quick installation and removability, delivering a level of flexibility and efficiency not commonly found in high-security barriers. This capability makes them ideal for both permanent installations and temporary protective measures, allowing for rapid deployment and reconfiguration as needed. By combining robust, real-world-tested protection with adaptable deployment, 3B Protection's line-of-sight walls meet the highest standards for modern security challenges.

KEY FEATURES:

- **Ballistic Resistance:** Provides UL Level 3–10 protection, capable of stopping threats ranging from small arms fire to armor-piercing .50 caliber rounds, making it ideal for high-risk environments.
- **Blast Resistance:** Designed to absorb and dissipate explosive energy, protecting both personnel and infrastructure from the damaging effects of blasts.
- **Forced Entry Protection:** Engineered to withstand aggressive intrusion attempts using tools, vehicles, or heavy equipment, maintaining secure perimeters and allowing time for response.
- **Fire Resistance:** Built to endure high temperatures and prevent fire spread, offering essential protection in facilities where fire hazards pose a serious threat.

QUICK INSTALLATION AND REMOVABILITY:

- One of the standout features of 3B's line-of-sight walls is their quick-install, removable design. They can be rapidly deployed across various environments, delivering reliable protection without the need for extensive construction. This makes them especially valuable in emergencies where time is critical, such as after a breach or during rapid fortification.
- **Ease of Removal:** These walls are just as easy to remove or reconfigure, allowing organizations to adapt as security needs change—without the delays or costs of permanent structures.
- **Temporary or Permanent:** Suitable for temporary use during events, high-threat periods, or emergencies, they can also serve as permanent barriers in high-security areas for long-term protection.

APPLICATIONS:

- Military Installations
- Critical Infrastructure
- Sensitive Government Properties
- Sensitive Commercial Properties
